Optimizing Your Summer Watering

ECCV customers have access to some great summer programs and offers that can make a big difference in water use while still creating exceptional home landscapes.

 **Eye On Water**—This free app connects to your ECCV account and provides you with real-time, updated information on your home water use. If your summer plans include a vacation, this is an awesome tool to help you spot any unexpected water use while away. Even when home, it's a great way to confirm sprinklers are running when intended if you're watering overnight. Get started at www.eccv.org/homeowner-information-eow.

 **Slow the Flow**—Get no-obligation, professional insight from a water efficiency pro. Our partners at Resource Central are scheduling these free system assessments throughout the summer. Book a consultation, and a specialist will come take a look at your landscaping, sprinkler system, and soil and let you know of any adjustments—many of which are do-it-yourself—that could help save water while still producing great results for your yard. See the info on the right for how to apply.

 **Turf Replacement**—Save water from now on. ECCV customers can receive hundreds of dollars in discounts for landscaping projects that swap out portions of turf for water efficient gardens and plantings. Discounts can be applied to turf removal services, new plants, or both. Submit your application now and there will be plenty of time to help your new landscaping get established. See the info on the right for how to apply.

ECCV offers customers a variety of water efficiency resources and tips for outdoor watering season. Take a look at our Customer Conservation Center at www.eccv.org/customer-conservation-center.

H2O, Now You Know

Get watering tips and answers in a live, virtual Q&A **Upcoming Virtual Sessions:**

Monday, June 3
6:30 p.m.

Tuesday, June 18
10:30 a.m.

Saturday, June 29
11:00 a.m.
